Founded in 1954, Clark Metal Products, is a privately owned Small Business and a HUBZone certified company located in Blairsville, PA. As an advanced manufacturing company specializing in precision metal fabrication, we help companies successfully design and manufacture products. Clark Metal Products is an industry leader in the fabricating sector. Through the use of technology and decades of manufacturing and technical expertise, we service a diverse customer base in markets such as healthcare, life sciences, precision instrumentation and robotics. We are always ready to discuss your project and how Clark can best serve you.

### Core Competencies

Clark Metal Products assists the (Prime Contractor) in its mission to (specific scope of work) by providing the following fabrication capabilities.

- Engineering Assistance: Clark uses the latest 3D modeling systems, including CREO and SolidWorks Platforms. With these systems, we can accept 3D model files and quickly transform data to a manufacturing state generating CNC programs for all cutting, punching, machining and bending processes.
- Fabrication: Fiber Laser Cutting, Punch/Laser capabilities, CNC Press Brake bending and Spotwelding
- CNC Machining - Mastercam
- Weld Capabilities: MIG/TIG and Robotic
- Metal Finishing: Provide finishing up to #8 finishes, irridite to MIL-DTL-5541 specification, a complete line of final coatings including powder coating while meeting the Clean Air Act requirements.
- Value-added Operations: Light mechanical Assembly & Screen Printing

### Differentiators

- Clark has recognized that our people are our largest asset thru cross-training and qualified candidate to meet Clark customer expectations.
- World Class Fabrication Facility with 60+ years of experience utilizing Value Stream manufacturing platforms.
- Part of Clark Metal Products success is providing exceptional customer service. One point of contact to support your manufacturing processes from initial concept to final product along with building long lasting relationships.
